

## **TECHNONICOL is the first among Russian manufacturers to become a member of the European PlasticsEurope Association**

*In addition to membership in the largest PlasticsEurope Association, the company joined the European Association of Extrusion Expanded Polystyrene Manufacturers EXIBA. This will allow TECHNONICOL to expand opportunities for the development on Western markets and increase the confidence of European consumers in its products.*

XPS TECHNONICOL is in demand in many European countries. TECHNONICOL plans to develop this export direction further. The European market is characterized by a commitment to tradition. That is why it is very important to comply with local requirements, standards and regulations. Considering the fact that XPS TECHNONICOL is exported to 25 EU states, harmonization with European standards is very important.

EXIBA's activities are focused on the development and optimization of the regulatory framework, its compliance with trends in green construction. Today the Association unites about 85% of European manufacturers of XPS, including enterprises in Austria, Belgium, Greece, Germany.

Membership in EXIBA opens up great prospects for TECHNONICOL in the field of knowledge sharing, obtaining up-to-date information of European trends in the industry, the opportunity to express the company's position on key issues of XPS application, including fire safety.

“Joining EXIBA is of fundamental importance to us. TECHNONICOL is the first Russian manufacturer in the Association. We are very interested in European initiatives and development in the field of environmental safety and XPS recycling. In addition, TECHNONICOL is constantly improving its skills, developing products, technologies, enterprises. This means that we are also ready to share our own expertise with European colleagues,” says Alexey Kasimov, head of Polymer Isolation direction of TECHNONICOL.
